## AQUA-POL

### Description

AQUA-POL is a dry powdered blend of organic polymers formulated for building a low solids mud system for rotary drilling.

### Application

AQUA-POL provides good hole clearing, cuttings encapsulation and filtration properties for controlling sticky formation and hydratable shale sections. It can also be used with KCl and NaCl salt systems to inhibit clay swelling. AQUA-POL can also be used in conjunction with AUS-GEL to build an effective rotary drilling mud system.

### Advantages

- Effective in fresh, salty and hard water.
- Non fermenting – does not require biocides.
- Biodegradable, non-toxic and non-polluting.

### Usage

Add 3 to 8 kg/1,000 litres water.

### Packaging

AQUA-POL is packaged in 15 kg plastic pails
