

Viscosifiers

AUS TROL

Description

AUS-TROL is a high molecular weight dry powdered organic polymer, which forms a high viscosity colloidal solution in fresh, salty or hard water.

AUS-TROL provides excellent viscosity and filtration control and will extend the yield of bentonite based drilling fluids.

Application

AUS-TROL is a protective colloid which inhibits the hydration of water sensitive formations, improving core recovery in diamond drilling applications.

Rod vibration, torque and pump pressure are reduced while penetration rates are increased together with extended bit life.

Advantages

- Highly effective - improved core recovery in most difficult drilling conditions.
- Versatile - can be used with other lubricants/surfactants in fresh or salty water.
- Economical - high activity reduces consumption.
- Convenient - easily transported.

Usage

Add 2.0 to 3.0 kgs/1,000 litres water:

Packaging

AUS-TROL is packaged in 1 kg plastic bags, 15 bags per pail or 15kg boxes.
