## AUSFLOC-L

### Description

AUSFLOC-L is a synthetic co-polymer which is used to flocculate drilled solids and promote settling in the surface pits.

### Applications

AUSFLOC-L is mixed slowly in fresh water and allowed to trickle into the circulating system. Rate of addition will depend upon rig circulating rates and also upon the type of formation being drilled, but will be in the range of 50 to 150 litres per hour.

### Advantages

- Ease of low-solids muds maintenance.
- Reduces water requirements.
- Increases penetration rates.
- Effective using small quantities.

### Usage

Add 2 litres to 1,000 litres of fresh water:

### Packaging

AUSFLOC-L is packaged in 25 litre plastic cubes.

### Head Office

5 Pitino Court, Osborne Park, Western Australia 6017
