

Lubricants & Cutting Oils

AMC ENVIRO-GREASE

Description

AMC ENVIRO-GREASE is a specially formulated blend of vegetable and synthetic oils to form a bio-degradable grease, manufactured for use as a diamond drilling rod grease. AMC ENVIRO-GREASE is bio degradable and environmentally friendly.

Application

AMC ENVIRO-GREASE is applied to the rods as they are run back into the hole. The grease is easily applied to the outer side of the drill rod and heating isn't required prior to use.

Advantages

- Environmentally friendly.
- Availability of different grades.
- Provides excellent adhesion and is effective in fresh to saline waters.
- Compatible with all types of lubricants and fluids systems.
- Highly effective in dry hole conditions.
- Cost comparable to hydrocarbon based greases.

Usage

Under normal drilling conditions, initially apply 1-2kgs ENVIRO-GREASE for 100m NQ rods. As hole greases up, use less after each bit change.

For dry hole conditions, use 2-3kgs AMC ENVIRO - GREASE per 100m for NQ rods and 3-4kgs of AMC ENVIRO-GREASE per 100m for HQ rods.

Greasing can be reduced by circulating degreasers and detergents through the bore hole.

Packaging

AMC ENVIRO-GREASE is packaged in 20 kg steel pails.
