BENTONITE PELLETS

Description

BENTONITE PELLETS are compressed tablets of highly swelling sodium bentonite which form a flexible, non-toxic seal.

Applications

Sealing of piezometers in boreholes.

Provide a seal between aquifers to prevent water migration.

Backfill abandoned wells.

Seal surface casing for boreholes. Bentonite has the capacity to absorb large quantities of water and to expand into an impermeable, glutinous mass.

The addition of cement to the BENTONITE PELLETS will provide resistance to water pressures if necessary.

Size

BENTONITE PELLETS are available in 3/8" and 1/4" size tablets.

Packaging

AMC BENTONITE PELLETS are packaged in 50lb (22.68kg) plastic pails.
